## Unique Submodels

### AZ7120G-8

2 needle 4 thread overlock machine for wider seam

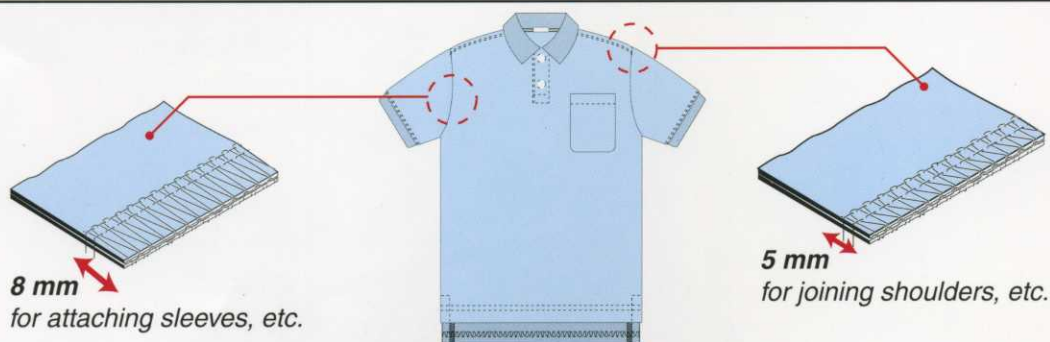

Your right choice of overlock machine for sewing outer knitwear!

This machine has unique feature that change of overlock width from 5 mm to 8 mm by simply exchanging stitch plate and presser foot stitch tongue. Conversion takes less than 10 minutes and no further mechanical adjustment is required.

AZ7120G-8 helps you being ready for any order to come.

Note:

If you are looking at conversion for narrower overlock width, i.e. 4mm or 2mm rolled edge, another 4 thread model AZ7020G-8 is recommended.

### AZ7525G-8

3 needle 6 thread "multi purpose" safety stitch machine

One machine can achieve many different seam styles!

By changing threading, you can obtain...

- a) 3 thread overlock, b) 3 thread overlock with reinforcing tape, c) 4 thread overlock,
  - d) 4 thread overlock with reinforcing tape, e) Single needle double chain stitch,
  - f) 5 thread safety stitch ( a + e ), g) 5 thread safety stitch with reinforcing tape ( b + e ),
  - h) 6 thread safety stitch ( c + e ), i) 6 thread safety stitch with reinforcing tape ( d + e )
- ... and higher flexibility.
